## Filter Weighing Solutions

Unsurpassed accuracy up to a tenth of a microgram for emissions determination with a Robotic Filter Weighing Solution or a Filter Weighing Kit installed.

- **Technical Specifications: Readability and Capacity**  
0.001 mg and 2.1 g to 6.1 g
- **Electrostatic Discharging**  
System controlled U-Ionizer for efficient discharging
- **Safe data management**  
Windows® software with barcode scanner
- **Excellent Connectivity**  
7 freely definable optional interfaces
- **Intuitive User Interface**  
Customizable colored touch - screen display

## Automated (Ultra)Micro Balances

Increase your productivity in the weighing of short and narrow tubular samples with METTLER TOLEDO XP Automated-S balances.

- **Technical Specifications: Readability and Capacity**  
0.1 µg to 1 µg and 2.1 g to 6.1 g
- **Easy sample placement**  
Easily accessible automated loading rack
- **Utmost performance**  
Fast stabilization time
- **Static-free environment**  
Integrated ionizer for highest accuracy
- **Speed through automation**  
Accelerated weighing processes

## Pipette Calibration Solutions

Fulfill all requirements while speeding up your calibration process: METTLER TOLEDO offers you efficient, compact and ergonomic solutions for single- and multi-channel pipette calibration.

- **Technical Specifications:**

Micro, single- and multichannel pipette calibration

- **MCP1-S Pipette Calibration System**

For single- and multi-channel pipettes

- **Space Saving**

Compact design

- **Ergonomic and Rapid**

Hands free operation

- **Highest Accuracy**

Test your balance regularly

- **Calibry Software**

Speed up Pipette Calibration
